EDUCATION

Bachelor of Science, Computer Science
California State University, Fullerton

Expected 2025

Associates of Science in Computer Science and Interdisciplinary Studies
Fullerton College

Spring 2022

RELATED COURSES

Algorithm Engineering
Computer Graphics
Computer Communications

Artificial Intelligence/Machine Learning
C Programming
Software Architecture

Database Programming
Operating Systems
Ethics in Computing

TECHNICAL SKILLS

- **Languages:** Python, C/C++; Proficient with HTML, XML, CSS, JavaScript, R, SwiftUI
- **Frameworks/Libraries/Environments:** Experience with ROS, TensorFlow, Keras, NumPy, Matplotlib
- **Project Management/OS/Editors:** Unix, Linux (Ubuntu 20.04, 22), macOS, Windows, VSCode, XCode, QT Creator, Git, Github, Jira, Jupyter Notebook, Google Collab, UnrealEditor
- **Other:** Gazebo, Blender, Adobe Creative Suite (Premiere Pro, Lightroom), DaVinci Resolve, UML Diagrams, Agile (Scrum/Kanban)

PROJECTS

Colorcoded - iOS Application | Developer

Spring 2024 - Present

- Implementing color detection algorithms, enabling users to precisely search and detect colors/relevant color data from a connected database of colors
- Developed main feature that recommends curated color palettes such as pastel, neon, and earthy options based on a selected color
- Collaborated with advisors to validate the project's viability and accommodated for changes in requirements based on advisor and peer feedback

SpotiData - Spotify-based metric analyzer | Developer

Fall 2024

- Developed a visual graphical analyzer program that predicted moods based on user data from recently played spotify songs
- Extracted and visualized song metrics of particular songs specific to users (i.e. Valence, Energy, Acousticness, Liveness, Danceability)
- Leveraged API tools to establish a secure login process, allowing users to connect through personal spotify accounts

ZSH Web-Tool Terminal System | Developer

Spring 2023

- Implemented and maintained a suite of shell scripts to streamline web tool access, automating browser interactions and timestamp logging
- Implemented custom aliases for frequently used applications, ensuring efficient access through terminal commands
- Ensured cross-terminal compatibility across various system configurations and made scripts portable

EXPERIENCE

Disneyland | Cast Member

August 2024 - Present

- Processed sales transactions, handling cash, card, and mobile disney payments at the largest retail store in Disneyland Park
- Monitored a wide variety of popular Disney merchandise, ensuring constant availability
- Adhered to Disney policies and procedures, ensuring the safety and satisfaction of all guests

Starbucks Coffee | Barista

June 2020 - June 2021

- Built beverages and cafe-style foods, upholding food safety standards and company customer service expectations
- Maintained cleanliness and organization of workspace and outlet, fulfilling custodial duties

EXTRACURRICULARS

Titan Rover | Autonomous Team

November 2024 - Present

- Refactored obstacle avoidance algorithms that worked alongside the rover's onboard camera systems, increasing latency by 10%, with accuracy improvements when encountering various obstacles types such as rocks, walls, and terrains
- Developed virtual simulations to facilitate testing within mock environments, resulting in a reduction of testing time of 25% and documenting results prior to real-time deployment
- Gathered various artifacts, including databases containing rock samples native to Utah desert used for training machine learning models

Kaba Kids

August 2017 - August 2018

University of California, Irvine

- Competed in various high-level group dance competitions such as Vibe, Body Rock, Bridge, Arena LA
- Placed 2nd overall in Bridge Jrs Dance competition in 2017
- Performed in Fantasyland theater at Disneyland Park, California
